# Module 1: Assignment

**Problem Statement:**

Create a simple menu-driven command line application using Nodejs in which the user can enter two numbers and perform addition, multiplication, subtraction, and division.

The requirements look like this:

1. The menu should contain these operations:

   - Addition
   - Subtraction
   - Multiplication
   - Division
   - Exit

2. The application should handle DivideByZero error by showing an error message.
3. The application should exit only when a user chooses the exit option in the menu.
